

# Paris Agreement and Agenda 2030 – Towards Policy Coherence

Public Workshop

Cities & Regions Pavilion, E.02, Pavilion Area, Bonn zone

## OVERVIEW

The Paris Agreement and the Agenda 2030 for Sustainable Development present many overlapping and complementary topics, which pave the way towards transformative policy. They rightfully recognise the regional and local levels as being of critical importance in moving towards sustainable development.

Indigenous peoples and local authorities are key actors when it comes to the implementation of these agreements: both assume important role model functions in their territories. This event will explore the contribution of the local level in implementing international agreements and take a deeper look at the opportunities for local authorities and indigenous peoples to learn from each other.

Join us for a lively discussion as well as light snacks and refreshments.

## PANELISTS

Mirian Cisneros – *Community of Sarayaku, Ecuador*

Veerle Dossche – *City of Ghent, Belgium*

Dorothee Rolfsmeyer – *City of Offenbach, Germany*
